

KUMARI ALETI

Macherla, Andhra Pradesh | +91-6305196288 | aletikumari08@gmail.com | linkedin.com/in/kumari-aleti-0a924b366 | github.com/kumarialeti

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building production-grade web applications using React.js, Node.js/Express.js, and FastAPI. Skilled in REST API design, JWT authentication, SQL/PostgreSQL, and role-based system architecture, with practical experience deploying multi-agent AI applications using LangChain, LangGraph, and Retrieval-Augmented Generation (RAG) pipelines. Comfortable working across the full stack with a focus on clean, interview-defensible code and Agile collaboration.

TECHNICAL SKILLS

Frontend: React.js, Vite, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit, React Router

Backend: Node.js, Express.js, FastAPI (Python), REST API Development, Middleware, Async/Await

Databases: PostgreSQL (SQL queries, joins, indexing, schema design), MongoDB (Mongoose), SQLite (SQLAlchemy), ChromaDB (Vector DB)

AI/ML: Python, LangChain, LangGraph, Multi-Agent Architecture, RAG Pipelines, Hugging Face Embeddings, Groq API (Llama 3.1), Google Gemini API, Scikit-learn, NumPy, Pandas, Flask

Authentication/API: JWT Authentication, bcrypt, Socket.io, RESTful API Design

Cloud/DevOps/Tools: Docker, Docker Compose, Nginx, Render, Vercel, Git, GitHub, CI/CD

PROJECTS

MediCarePro (DocSpot) — Full-Stack Telemedicine & Appointment Platform

React, Vite, Node.js, Express.js, MongoDB, Socket.io, JWT | GitHub: github.com/kumarialeti/doctor-app | Live: doc-booking-online.vercel.app | 2025

- Built and deployed a full-stack telemedicine platform with a React/Vite frontend and Node.js/Express.js REST API backend on MongoDB, implementing role-based dashboards and authorization for patients, doctors, and admins.
- Implemented JWT authentication with bcrypt password hashing and a forgot-password flow using OTP generation with expiry validation.
- Developed real-time patient-doctor chat with typing indicators using Socket.io, and integrated the Jitsi React SDK for in-app video consultations mapped to unique appointment-based rooms.
- Engineered doctor search/filtering, slot-based appointment booking, Cloudinary-based profile/medical report uploads, admin analytics, and payment status tracking; deployed frontend on Vercel.

AgriSaarthi — AI-Powered Multi-Agent Agricultural Assistant Platform

React, Vite, Tailwind CSS, Node.js, Express.js, PostgreSQL, FastAPI, LangGraph, Gemini API, ChromaDB | GitHub: github.com/kumarialeti/AgriSaarthi | Live: agri-saarthi-one.vercel.app | 2026

- Built a full-stack AI-powered agricultural assistant with a React/Vite/Tailwind CSS frontend, a Node.js/Express.js REST API backend, and PostgreSQL for farmer profiles, fields, crops, and chat history.
- Designed a LangGraph multi-agent orchestration layer on a FastAPI service that routes farmer queries to specialized agents (Weather, Market, Crop Health) powered by the Google Gemini API.
- Built a RAG pipeline using ChromaDB as a local vector store to ground responses in a verified agricultural knowledge base, with a safety-validation node preventing unsupported chemical advice and hallucinated market data.
- Integrated live data feeds — Open-Meteo API for real-time weather and the Agmarknet API (data.gov.in) for state/crop-based market prices — with graceful fallback on API failure.
- Delivered multilingual support (English, Telugu, Hindi) and context-aware recommendations from farmer profile data; secured endpoints with JWT auth and owner-scoped access, containerized with Docker Compose.

WORK EXPERIENCE

Full Stack Developer Intern — SmartBridge and APSCHE

June 2025 – July 2025

Andhra Pradesh, India

- Developed and deployed full-stack web application features using React.js, Node.js, and REST APIs in a structured, industry-aligned internship program.
- Collaborated in an Agile team, participating in sprint planning, code reviews, and feature delivery using Git and GitHub.

AI & Machine Learning Virtual Intern — SmartBridge Educational Services (in collaboration with APSCHE)

Short-Term Virtual Internship Program — 2 Months (120 Hours) | Virtual

- Completed a structured 120-hour virtual internship on Artificial Intelligence and Machine Learning, covering Python, NumPy, Pandas, Scikit-learn, and data visualization with Matplotlib/Seaborn.
- Built and trained a Scikit-learn classification model as a capstone project to predict a country's Human Development Index (HDI) tier from Life Expectancy, Mean Years of Schooling, and GNI per capita, and deployed it as a Flask web application.

Web Development Intern — TechSonix Solutions

April 2025

Remote

- Built and maintained frontend components, integrated third-party REST APIs, and improved UI responsiveness across device breakpoints.
- Gained hands-on experience with API integration and Git/GitHub version control workflows.

EDUCATION

Bachelor of Technology – CSE (Artificial Intelligence & Machine Learning)

Aditya College of Engineering and Technology, Andhra Pradesh | CGPA: 7.87/10.0 | Expected Graduation: May 2027

CERTIFICATIONS

IBM SkillsBuild – Getting Started with Artificial Intelligence | IBM SkillsBuild – Make Agentic AI Work for You | Hugging Face – Fundamentals of Agents | Microsoft Learn – Introduction to Generative AI and Agents
